HTC REPORTS FIRST QUARTER 2026 RESULTS

Taipei, Taiwan – May 6, 2026 – HTC Corporation (TWSE: 2498), a global leader in immersive and connected technologies, today announced consolidated results for first quarter ended March 31, 2026.

1Q26 Financial Highlights：

- Quarterly revenue of NT$0.65 billion with a gross margin of 41.7%.
- Quarterly operating loss of NT$0.56 billion with an operating margin of -86.2%.
- Quarterly net loss attributable to owners of the parent was NT$0.24 billion, or an EPS of -NT$0.29.

1Q26 Business Update：

- HTC has continued to expand its overseas AI wearable footprint. VIVE Eagle has officially launched in Singapore partnering with Singtel, and debuted a localized update in Hong Kong featuring a new Cantonese voice function. The product has integrated an AI assistant, voice interaction, smart photography, and image translation supporting 70+ languages. Addressing the increasing attention on security and privacy issues surrounding AI wearables, VIVE Eagle has employed de-identification measures to ensure privacy protection. Simultaneously, it has passed ISO 27001 and ISO 27701 dual international certifications, reinforcing high standard information security and privacy design.

- HTC G REIGNS has been invited by LITEON Technology to participate in their exhibit at MWC 2026, Showcasing the results of both parties' successful commercial deployment of 5G private networks in Germany. The exhibition has focused on the integration of 5G SA private networks with XR and edge computing, demonstrating the ability to maintain low latency, high stability, and high-bandwidth transmission even under multi-terminal synchronization and heavy traffic loads. Through the support of high-performance 5G RU technology, both parties have further checked the potential for scalable deployment in enterprise immersive application scenarios and have provided telecommunications operators and corporate clients with more comprehensive integrated private network solutions.

- HTC has partnered with NHK, NHK Promotions, and NTT DOCOMO Studio & Live to launch a large-scale immersive cultural entertainment experience, “Samurai's Dream: The Ghost of Osaka Castle”, and created the world’s first 'Osaka Castle Reconstruction' Free Roam XR experience. This collaboration has combined the historical content and video production capabilities of Japanese public media with the XR technology and immersive platform capabilities of VIVERSE. It has transformed cultural heritage into scalable and exportable LBE content, and has demonstrated the application potential of XR technology in cultural storytelling and live entertainment.
